Gradients are lines or areas of color that display a gradual transition of color from one side to another. Gradients can be useful for adding a decorative effect to images or for masking certain areas of an image. Gradient Fill lets you specify gradient fills that are applied to shapes or entire areas of an image, applying the fill's colors gradually or at specific spots. Gradient Fill masks allow you to apply gradients to images while maintaining the shape and artwork behind the image. Layer Styles is another option for applying special effects to images. You can apply a stroke, a drop shadow, a reflection, and more. Paintbrushes are one of the most versatile tools in Photoshop. They can be used for various effects, including painting, erasing, retouching, and coloring images. Pen tools can be used for several effects, including drawing, erasing, scribbling, and writing. Paths are used to draw and outline geometric shapes, such as polygons, ellipses, arcs, and circles. They can be used to create or edit any path, which is essentially a drawing of a shape. The Pattern Fill can fill an area with a repeating pattern or image. It is useful for applying a pattern to an image, replacing an image, or for adding a decorative effect. Pattern Fill masks let you apply pattern fills to images while maintaining the shape and artwork behind the image. The Pattern Palette provides several pattern fill options for creating and customizing patterns. The Puppet Warp provides a warp tool, which can be used for distorting the shape of an image. The Puppet Warp tool is very useful for special effects, such as distorting the placement of an object, distorting the shape of a picture or image, or even creating abstract images. The Shadows and Highlights control the overall appearance of the image. They are used to create light or dark areas. The Shadow and Light tools are useful for correcting areas of an image that are too light or too dark, and for creating highlight and shadow effects in your photos. Transparency effects: The Channels control how an image appears when it is pasted onto another image or onto a white background. It is useful for changing the transparency of an image, making it appear like you are looking at a photo on a piece of transparency paper. Undo and Redo. These tools are used to undo or redo your most recent action. Undo and Redo do not work with layers, but they will undo the
